

Bumble Bees Day Nursery & pre-School

April/May 2025 (sorry it's late!!)

Easter

We hope you had an enjoyable bank holiday weekend and Easter. 🐣

Thank you for all the cards, chocolates and cakes, they were a real treat for all of us staff.

Our new topic of mini beats and life cycles, together with our forest school sessions, is proving to be a great opportunity for some wonderful learning. We will keep parents updated via tapestry on all activities the children are taking part in.

Dates for the diary

Preschool trip to Godstone Farm – Monday 7th July
Preschool graduation – Tuesday 15th & Friday 18th July
Evie Townsend Photography – Tuesday 15th July
Annual Family Picnic – Friday 25th July

Lunches

With the warmer weather (hopefully) approaching we are aiming for picnics outside for each of our age groups at least once a week. Therefore, please provide a picnic packed lunch with cool pack in their lunch boxes so all children can join in.

Additionally, please can we remind parents that we are a **NO NUT NURSERY**. We have children who attend who have an EpiPen for nut and sesame allergies therefore would appreciate your consideration with this when preparing your child's lunch.

Policy

A reminder that all our policies are on the Bumble Bees website or in the folder in the lobby available for you to read.

Topics

May - Mini beasts & life cycles

June - Under the sea

July - Summer

Staffing

We are excited to share that Hannah is now our Third in Charge and will be a great asset to the management team. Previously, we have not required the position, however, with the nursery expanding and at full capacity, we feel an extra pair of hands will take some of the load off. Hannah remains working with the children and with her key children.

Katie is soon due to join us to replace Emily with the babies. Katie is Level 3 Qualified, from the village, has a son and has been in childcare for many years. We are excited to welcome her to the Bumble Bees team.

Sun cream

Please could we ask parents to apply suncream to children in the morning before attending nursery and ensure there is an in date, labelled bottle for us to keep here. We will keep suncream topped up throughout the day. During the very warm weather, children will not be out in direct sunlight during the hottest part of the day.
